GV-UNP2500 / GV-UNFE2503

GeoVision Unicam Series

GV-UNP2500 for Covert Surveillance

GV-UNP2500 is the first model in the discreet Unicam Series to be released by GeoVision. It is a **2MP super low-lux pinhole** camera ideal for indoor installations with variable lighting.

Designed for maximum flexibility, the UNP2500 is small-sized and comprises a main unit and a separate sensor unit. The units are connected by a 3.28ft cable or an optional 32.8ft cable, which provides the flexibility to place the sensor unit apart from the main unit at various distances. The UNP2500 is equipped with a 1/2.8" progressive scan **super low-lux** CMOS image sensor for clear color images with as little as 0.02 lux of lighting. Combined with its discreet design and small form factor, the super low-lux capability makes the UNP2500 an ideal candidate for covert surveillance in compact environments with variable lighting, such as **ATMs, banks, police station, hotels, and stores.**

The GV-UNP2500 provides outstanding HDTV **1080p** image quality at full frame rate in H.264 and MJPEG. It comes with a fixed lens that can adjust field view from 20cm to 20m. It also provides outstanding microphone quality to ensure proper sound recording.
