

12MP

High Quality

One camera sees all! 12MP available in box and fisheye models

12MP GV-FER12203 and GV-BX12201

4K Ultra-High Resolution for Superior Image Quality

The **4K Ultra HD** standard is hailed as the next benchmark for video surveillance cameras. Offering **four times the resolution of HDTV 1080p**, 4K provides the ability to overlook large areas while also being able to capture fine details. As one of the leaders in the industry, GeoVision releases the 4K 12MP Series, which consists of the **GV-FER12203** fisheye model and the **GV-BX12201** box camera model. This top-of-the-line series offers video resolution of **4000 x 3000** at 15 frames per second or 2896 x 2768 at 25 frames per second, which is the highest resolution available in the security industry.

In addition to delivering 4K ultra high definition images, GeoVision's 12MP Series is also designed to meet various application challenges for consistency and stability under a wide range of settings. The GV-FER12203 is the 360° fisheye model of the 12MP Series. This state-of-the-art model is rated IP67 weather-proof and IK10+ vandal resistance, making it the perfect anti-blindspot solution for outdoor applications. It is also suitable for dark environments with minimum illumination of 0.05 lux, and features an IR illumination ring for a 50 feet range of clear night vision. For ease of installation, the GV-FER12203 is fully supported through PoE and requires no additional power source.

The GV-BX12201 is the box camera offering of the 12MP Series. It offers low-lux capability to provide clear videos with minimum illumination of 0.05 lux. For environments with complex lighting, the GV-BX12201 features Wide Dynamic Range to compensate for highly contrasting light intensities. As with the GV-FER12203, the box model is also fully supported through PoE.

IN STOCK NOW

NEW!

12MP Fisheye

- 12MP Progressive scan CMOS
- 15fps at 4000x3000 resolution
- 3DNR noise reduction
- Up to 50 feet IR illumination for clean night vision
- 2-way audio
- Multiple viewing and dewarping modes
- POE/DC 12V/AC 24V

Model: GV-FER12203
Ordering Part: 120-FER12203-000
SKU: 84-FER12203-001U

NEW!

12MP Box

- 12MP Progressive scan CMOS
- 15fps at 4000x3000 resolution
- 3DNR noise reduction
- Wide Dynamic Range
- 2-way audio
- POE/DC 12V/AC 24V
